Documentation. To access our online documentation, first set your version and language preferences, then select the specific guide you are interested in.

Gurobi Documentation

That does not apply to GNU Octave, therefore the usage is in general prohibited. It should suffice "although interpretations of this vary" to contact the author directly to send you the code personally (maybe released under a free license), or download the code from the author's own website, if available.

Possible origins. The initialism appeared in print in 1979 on the table of contents page of the LINPACK User's Guide in the form "R.T.F.M." -- Anonymous, suggesting that it was already well established. Cleve Moler has since revealed that a visit to Argonne National Laboratory by Tektronix software manager Ned Thanouser during the development of MATLAB led to the anonymous quote.

CORDIC (for COordinate Rotation DIgital Computer), also known as Volder's algorithm, is a simple and efficient algorithm to calculate hyperbolic and trigonometric functions, typically converging with one digit (or bit) per iteration. CORDIC is therefore also an example of digit-by-digit algorithms. CORDIC and closely related methods known as pseudo-multiplication and pseudo-division or factor ...
