The following is a list of people who are considered a "father" or "mother" (or "founding father" or "founding mother") of a scientific field. Such people are generally regarded to have made the first significant contributions to and/or delineation of that field; they may also be seen as "a" rather than "the" father or mother of the field. Debate over who merits the title can be perennial.

*P. acnes* grows better at a pH range of 6.0 to 7.0 than in a more acidic or alkaline milieu (). In blood cultures, *P. acnes* grows better in anaerobic bottles but is also able to grow in aerobic bottles because of the anaerobic microenvironment that develops at the bottom of nonshaken bottles (). The optimal temperature for growth is between 30°C and 37°C ().

Health care in the United States is provided by many distinct organizations. Health care facilities are largely owned and operated by private sector businesses. 58% of US community hospitals are non-profit, 21% are

government owned, and 21% are for-profit. According to the World Health Organization (WHO), the United States spent \$9,403 on health care per capita, and 17.1% on health care as ...

Backgroundâ€” Infective endocarditis is a potentially lethal disease that has undergone major changes in both host and pathogen. The epidemiology of infective endocarditis has become more complex with todayâ€™s myriad healthcare-associated factors that predispose to infection. Moreover, changes in pathogen prevalence, in particular a more common staphylococcal origin, have affected outcomes ...
