Operations research, or operational research in British usage, is a discipline that deals with the application of advanced analytical methods to help make better decisions. Further, the term 'operational analysis' is used in the British (and some British Commonwealth) military as an intrinsic part of capability development, management and assurance.

In economics and sociology, the means of production (also called capital goods) are physical and non-financial inputs used in the production of economic value. These include raw materials, facilities, machinery and tools used in the production of goods and services. In the terminology of classical economics, the means of production are the "factors of production" minus financial and human capital.

In 2007, meat production remained steady at an estimated 275 million tons; in 2008, output is expected to top 280 million tons. 1 (See Figure 1.) Experts predict that by 2050 nearly twice as much meat will be produced as today, for a projected total of more than 465 million tons. 2 For more than a decade, the strongest increases in production have been in the developing world-in 1995 more meat ...
