Sedimentation is the collective name for processes that cause these particles to settle in place. The particles that form a sedimentary rock are called sediment, and may be composed of geological ...

Introduction to Intrashelf Basins . Isolated intrashelf basins (ISBs) are carbonate systems that punctuate the carbonate sedimentary sections of intracratonic plates throughout the Phanerozoic. These intrashelf basins are the product of carbonate depositional systems responding almost instantaneously to fill accommodation space caused by relative sea level change.
